Subject: Electric Power Rate Increase

The subject increase proposed by the AEPCO will ultimately result in a 9% increase in my electric service from the SSVEC. I have been advised that none of this increase will go to the SSVEC for the services they provide. I find it difficult to understand how the SSVEC can continue to operate at a profit without any rate increase since 1992 and the provider of energy to the SSVEC needs an increase of 9%.

I wish to express my strong opposition to this increase.

Respectfully,

William Hall

Dear Commissioners;

I am a customer of SSVEC and take strong exception to the Environmental Portfolio Standards that are currently being considered by the Arizona Corporation Commission.

While everyone is in agreement that renewable energy resources are important, I do not want our monthly Environmental Surcharge increased and do not want my electric company to be required to purchase renewable energy on the open market. Such a practice will lead to artificially inflated electric bills.

It seems that other areas that rely on renewable energy have very low electric bills compared to Arizona's and that the energy companies should obtain their own means of funding renewable energy which would, in the long term, save them money. Once the electric rates go up, no matter how much the electric companies are profiting by using renewable energy, the rates will never go down.

In my opinion, from comparing electric bills with people from other states I've traveled, Arizona is already paying in inflated amount for electricity and the electric companies should foot the bill for renewable energy resources.

Sincerely,

Carol D. Vogt

Dear Commissioners;

I am a customer of Sulphur Valley Electric and take strong exception to the Environmental Portfolio Standards that are currently being considered by the Arizona Corporation Commission. I do not want our monthly Environmental Surcharge increased and do not want my electric company to be required to purchase renewable energy on the open market. Such a practice will lead to artificially inflated electric bills.

Sincerely,"

Dear Commissioners;

We are customers of the Sulphur Springs Valley Electric Cooperative, Inc. and take strong exception to the Environmental Portfolio Standards that are currently being considered by the Arizona Corporation Commission. We think it is fiscally irresponsible of the ACC to favorably consider imposing a 40 per cent environmental cost burden on people that use electricity. To demand it by 2010 is even more reprehensible. We do not want our monthly Environmental Surcharge increased nor do we want our electric cooperative to be required to purchase renewable energy on the open market. Such a practice will only lead to artificially inflated electric bills.

Sincerely,

Duane R. Brofer

Dear Commissioners;

I am a customer of (Sulphur Springs Valley Electric Cooperative) and take strong exception to the Environmental Portfolio Standards that are currently being considered by the Arizona Corporation Commission. I do not want our monthly Environmental Surcharge increased and do not want my electric company to be required to purchase renewable energy on the open market. Such a practice will lead to artificially inflated electric bills.

It is my understanding that the United States is not a party to the Keoto Treaty and it seems to me this is part of that treaty, please explain!

Sincerely,

Signature
